Uniform Layer Haircut (90 Degree)- Create a uniform layer (90 degree) haircut and design with criteria selected by the national technical committee within a 45-minute time period, styling the hair with hair dryer and fingers only

1. Assemble tools (shears, comb and blow dryer) and prepare station part and clip hair into a four-section parting drop hairline guide

2. Drop a 1/2-inch hairline guide around the entire perimeter

3. Establish the design length around the back perimeter using a 90 degree Elevation

4. Establish the design length around the front perimeter using a 90 degree Elevation

5. Check to ensure that the front and back perimeter guides are connected

6. Establish the same length interior guide at the top of head (apex, crown)

7. Continue cutting interior guideline from hairline from an established interior guide at the top of the head

8. Continue cutting interior guideline from the established interior guide at the top of the head/apex to the back-hairline perimeter guide

9. Use vertical partings to blend top guide to design line

10. Maintain a constant 90-degree elevation throughout the procedure

11. Follow a traveling guide to maintain uniformly layered lengths

12. Perform a cross check of procedure for accuracy and finish if necessary

13. Finished cut is uniformly blended

14. Blow hair dry to frame face

15. Clean and organize station
